**DETAILED ACTION*****Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-16, drawn to flow cytometric method of measuring dendritic cell function in whole blood by assaying for intracellular antigens that indicate dendritic cell activation.

Group II, claim 17 and 18, drawn to flow cytometric method of measuring dendritic cell function in whole blood by assaying for cell surface markers that indicate dendritic cell activation.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Invention I requires the dendritic cells to be activated and permeabilized or lysed so as to cause antibodies to bind inside the cells for measurement of intracellular antigen activation while Invention II is activated and measured for activation at cell surface level; hence no permeabilization procedure is required.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

· Art Unit: 1641

· remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
